Canon imageRUNNER ADVANCE C2000 series

Practical multifunctional color printer for the office

"This device requires very little maintenance, so you will not see me visiting your office very often"

Sean — Océ service engineer

A Canon color system gives you the power to perform. Bringing big, bold, high-impact color right into your office. Stir in the Océ expert knowledge force and you also gain the people to succeed. Specialists who understand your needs and add personality to your printers. So that your color printing systems integrate seamlessly into your total knowledge-management infrastructure. And provide support for greater business success.

Océ and Canon

In 2010, Océ joined the Canon family to create the global leader in the printing industry. This compelling union combines the 130-year heritage of Océ customer-driven innovation with the vast technical and financial resources of Canon. The result? Unmatched scale in research and development, manufacturing, and distribution, together with accelerated development of new innovations and the industry's broadest choice of hardware, software, and workflow solutions.

Choose a practical multifunctional color printer for the office

Step up to smarter color with the compact, convenient, and sustainable Canon imageRUNNER ADVANCE C2000 series. Bringing full-color networked printing, copying, scanning, and (optional) faxing to your office in one elegant system. Available at speeds of 20, 25, or 30 ppm in color or black & white.

Communicate more conveniently

Satisfy your employees with the convenience built into the Canon imageRUNNER ADVANCE C2000 series. In-line stapling and sorting, customizable favorite buttons, company-defined templates, and universal send, contribute to an easier document flow. The system has the same color interface as the other Canon imageRUNNER ADVANCE systems, so there are no new methods to learn: more time to focus on business results.

Support sustainability without sacrifice

The Canon imageRUNNER ADVANCE C2000 series doesn't make you choose between high-impact color documents and sustainability. The system has the lowest TEC rating in its class (1.47/1.0 kWh/w). It's also EPA ENERGY STAR® certified and has received Blue Angel certification, and exceeds EU RoHS standards. By incorporating recycled and bio-plastics, the devices show commitment to a healthier world.

Enjoy effective color document production

As part of a fleet or as a stand-alone device for your small business, workgroup, or branch office, the Canon imageRUNNER ADVANCE C2000 series gives you an impressive return on investment, while delivering up to 1200 x 1200 dpi quality.

Canon imageRUNNER ADVANCE C2000 series

Practical multifunctional color printer for the office

The devices score high points on effectiveness:

- Standard Canon controller for consistent high performance and quality
- Genuine Adobe PostScript support (option for i-models) for hassle-free flow of documents
- Up to four paper trays with a maximum of 2000 sheets for longer document runs
- Automatic duplexing for cost and time-savings
- Scan-to and print-from USB for portable document production

Ensure control of your documents

Your IT administrator can choose from a host of security options, covering network, data* and device security, all with an eye toward safeguarding your precious information. The devices also support the optional software, which allows you to keep track of print costs, and manage security, routing, and maintenance centrally. With Department ID on board, you can make sure that access to color printing and copying is controlled by you.

* hard disk encryption and erase are available on i-model only

Smoothly integrate color into your workflow

The budget-friendly Canon imageRUNNER ADVANCE C2000 series has the options you want, with none of the frills you don't. So it integrates color and black & white document production into your current ways of working without wasting resources. The system cleverly fits with other systems in your fleet, using a client-server relationship to other Canon imageRUNNER ADVANCE systems. The devices can tap into various functions that are available on the larger ADVANCE systems*. This means end users can access even more powerful document production and distribution methods via your network.

Options to Support your Office Document Workflow

The Canon imageRUNNER ADVANCE C2000 series is designed to fully meet your needs. You can choose between a 20, 25, or 30 ppm model.

The imageRUNNER ADVANCE C2000 series consists of an L-model and an i-model. The L-model gives you a price-conscious, entry-level device with a flash-based memory and a basic set of options. The i-model comes in a more extensive basic configuration that includes an 80-GB hard disk and standard Universal Send. The i-model offers an upgrade for Adobe PostScript printing and features a 3-Way Unit to enable finishing.

Main hardware options:

- Document feeder or cover & glass platen
- Paper input with 2 trays or pedestal
- Envelope feed kit
- Copy tray
- Inner 2-Way Tray
- Inner finisher
- Extra output tray for Inner finisher
- Removable hard disk (only for i-model)
- Fax kit
- Memory Card and Stick Reader
- Canon card reader

- 1 Document feeder**
The 50-sheet capacity document feeder supports scanning up to 44 originals per minute in color and black & white.
- 2 Workflow integration**
Intelligent support of file sharing and document reproduction, respecting the existing document workflow, taking into consideration current and future security requirements.

- 3 Operator panel**
The intuitive 5.7-inch full color touchscreen is easy to use and provides control over your documents.
- 4 Controller**
i-model: Canon 0.8 GHz controller with 2-GB RAM and 80-GB hard disk.
L-model: Canon 0.8 GHz controller with 2-GB RAM and 4-GB flash memory.

- 5 Paper Input**
The standard paper trays and Bypass tray provide 900-sheet capacity. The maximum input capacity is 2000 sheets.
- 6 Compact finishing**
Choice of finishing: compact Inner Finisher with multi-position stapling and sorting; Inner 2-Way Tray for sorting and separating print & copy output.

Creating global leadership in printing

Canon and Océ have joined forces to create the global leader in the printing industry. For our customers, this combines Canon and Océ technology with the support of the Océ direct sales and service organizations. Look to the new Canon-Océ combination for:

- Enterprise printing in the office and corporate printroom
- Large format printing of technical documentation, signage, and display graphics
- Production printing for marketing service bureaus and graphic arts
- Business Services for document process outsourcing
